III : Detailed Machines list

80BPH WASHING/FILLING MACHINE

1) Picture.

2) Specifications

Machine size	2700x400x1650mm
Packing size	2800x500x1700mm
Rated power	1500W(Don't have the heating function)
Rated pressure	0.6Mpa
Air exhaust	200L/m

3) Features

This machine is specially designed to fill the purified water and the distilled water, mineral water and other bacteria free liquids. The equipment is applied with 5GAL bottles (bottles of 3 or 6 gallon can also be applied, but the sample bottle shall be provided.) As the equipment integrates the processes of bottle washing, filling, lid mounting, lid pressing and finished product delivering, it is the ideal choice of water plants.

For operations, the equipment can be configured with the following machines: auto cap removing machine, bottle external washer, auto loader, shrinking machine, light inspection equipment and other equipments.

1. Water-shortage protection: when the level of the water tank is lower than that of the float switch, the equipment will be automatically stopped;

4. Stress filling in the enclosed environment

5. Filling time adjusted between two levels—0.1 Second and 1 Second. Ensuring the precision for filling volume.

6. Reasonable washing process: For 80BPH, there are 3 washing working stations: We may also manufacture according to customer's request. 1.clean water washing 2-3.pure water washing We may also manufacture according to customer's request.

7. In the washing station, the bottle is conveyed by the cylinder.

8. PLC : Mitsubishi / Omron

9. All Pipe is #304 Stainless Steel

10. Electrical : Schneider / Omron

Term of Payment :

30% Down Payment

70% Setelah unit mesin siap dikirim (Sebelum Dikirim)
